Requirements Traceability Matrix

Writer's Creative Ideas Information System

Academic / Engineering Project

Revised client-server baseline

This matrix links each requirement to its acceptance criterion and to any applicable Given–When–Then (BDD) scenario in the SRS. Scenario references use the numbering and titles in Section 5 of `spec/srs.tex`. Architectural requirements cover the mobile client, REST API resources, and offline synchronization. Blank columns are reserved for future ticket, automated test, code, and documentation references; blank means not yet assigned.

Requirement ID	**Acceptance Criterion**	**BDD Scenario**	**Ticket**	**Test**	**Code**	**Documentation**
REQ-F-001	AC-F-001	S7: Offline Use and Persistence				
REQ-F-002	AC-F-002	S2: Create an Entry with All Details				
REQ-F-003	AC-F-003	S1: Generate a Display Title; S2: Create an Entry with All Details				
REQ-F-004	AC-F-004	S2: Create an Entry with All Details; S8: Create and Structure a General Note				
REQ-F-005	AC-F-005	S8: Create and Structure a General Note				
REQ-F-006	AC-F-006	S2: Create an Entry with All Details; S8: Create and Structure a General Note				
REQ-F-007	AC-F-007	S2: Create an Entry with All Details; S8: Create and Structure a General Note				
REQ-F-008	AC-F-008	S10: Delete an Entry				
REQ-F-009	AC-F-009	S2: Create an Entry with All Details; S8: Create and Structure a General Note				

Requirement ID	Acceptance Criterion	BDD Scenario	Ticket	Test	Code	Documentation
REQ-F-010	AC-F-010	S3: Chapter and Book Associations				
REQ-F-011	AC-F-011	S3: Chapter and Book Associations				
REQ-F-012	AC-F-012	S3: Chapter and Book Associations; S6: Export Book Project in Chapter Order				
REQ-F-013	AC-F-013	S3: Chapter and Book Associations; S8: Create and Structure a General Note				
REQ-F-014	AC-F-014	S3: Chapter and Book Associations				
REQ-F-015	AC-F-015	S3: Chapter and Book Associations; S8: Create and Structure a General Note				
REQ-F-016	AC-F-016	S3: Chapter and Book Associations				
REQ-F-017	AC-F-017	S3: Chapter and Book Associations				
REQ-F-018	AC-F-018	S3: Chapter and Book Associations				
REQ-F-019	AC-F-019	S4: Symmetric Entry Links				
REQ-F-020	AC-F-020	S4: Symmetric Entry Links				
REQ-F-021	AC-F-021	S4: Symmetric Entry Links				
REQ-F-022	AC-F-022	S5: Search and Combined Filters; S7: Offline Use and Persistence				
REQ-F-023	AC-F-023	S5: Search and Combined Filters				
REQ-F-024	AC-F-024	S5: Search and Combined Filters				
REQ-F-025	AC-F-025	S5: Search and Combined Filters				
REQ-F-026	AC-F-026	S7: Offline Use and Persistence; S9: Export Success and Failure				
REQ-F-027	AC-F-027	S6: Export Book Project in Chapter Order				
REQ-F-028	AC-F-028	S6: Export Book Project in Chapter Order				

Requirement ID	Acceptance Criterion	BDD Scenario	Ticket	Test	Code	Documentation
REQ-F-029	AC-F-029	S6: Export Book Project in Chapter Order				
REQ-F-030	AC-F-030	S11: Server API Resource Management				
REQ-F-031	AC-F-031	S11: Server API Resource Management				
REQ-F-032	AC-F-032	S11: Server API Resource Management				
REQ-F-033	AC-F-033	S11: Server API Resource Management				
REQ-F-034	AC-F-034	S3: Chapter and Book Associations; S4: Symmetric Entry Links; S11: Server API Resource Management				
REQ-F-035	AC-F-035	S7: Offline Use and Persistence; S12: Offline Change Synchronization				
REQ-F-036	AC-F-036	S12: Offline Change Synchronization				
REQ-F-037	AC-F-037	S13: Resolve a Synchronization Conflict				
REQ-NF-001	AC-NF-001	NFR verification: save latency with 1,000-entry SQLite fixture on minimum OS simulator/emulator				
REQ-NF-002	AC-NF-002	NFR verification: search/filter latency with 1,000-entry SQLite fixture on minimum OS simulator/emulator				
REQ-NF-003	AC-NF-003	S7: Offline Use and Persistence				
REQ-NF-004	AC-NF-004	S7: Offline Use and Persistence				
REQ-NF-005	AC-NF-005	S3: Chapter and Book Associations; NFR verification: relationship integrity across create/edit/detach/delete				
REQ-NF-006	AC-NF-006	S3: Chapter and Book Associations				

Requirement ID	Acceptance Criterion	BDD Scenario	Ticket	Test	Code	Documentation
REQ-NF-007	AC-NF-007	NFR verification: install and launch on Android API 29+ and iOS 15+				
REQ-NF-008	AC-NF-008	NFR verification: core workflows at 360 x 640 dp viewport				
REQ-NF-009	AC-NF-009	NFR verification: accessibilityLabel presence and platform text scaling				
REQ-NF-010	AC-NF-010	S9: Export Success and Failure				
REQ-NF-011	AC-NF-011	S9: Export Success and Failure				
REQ-NF-012	AC-NF-012	NFR verification: ISO-8601 UTC timestamps and 2 MB FIFO log rotation				
REQ-NF-013	AC-NF-013	NFR verification: confirm no user-facing diagnostic-log UI				
REQ-NF-014	AC-NF-014	NFR verification: TDD evidence and Jest statement/branch coverage thresholds for client and backend components				
REQ-NF-015	AC-NF-015	NFR verification: inspect HTTPS transport, JSON payloads, versioned REST paths, HTTP methods, and response status codes
