Requirements Traceability Matrix

Writer's Creative Ideas Information System

Academic / Engineering Project

Revised requirements baseline
Version 2.0

This matrix is paired with the revised client-server SRS in `spec/srs.tex`. It links every requirement to its acceptance criterion and, where applicable, to a Given–When–Then (BDD) scenario in Section 5 of the SRS. Blank columns are reserved for future ticket, automated test, code, and documentation references; blank means not yet assigned. This version supersedes the offline-only baseline.

Requirement ID	**Acceptance Criterion**	**BDD Scenario**	**Ticket**	**Test**	**Code**	**Documentation**
REQ-F-001	AC-F-001	S7: Offline Use, Persistence, and Deferred Sync				
REQ-F-002	AC-F-002	S2: Create an Entry with All Details				
REQ-F-003	AC-F-003	S1: Generate a Display Title; S2: Create an Entry with All Details				
REQ-F-004	AC-F-004	S2: Create an Entry with All Details; S8: Create and Structure a General Note				
REQ-F-005	AC-F-005	S8: Create and Structure a General Note				
REQ-F-006	AC-F-006	S2: Create an Entry with All Details; S8: Create and Structure a General Note				
REQ-F-007	AC-F-007	S2: Create an Entry with All Details; S8: Create and Structure a General Note				
REQ-F-008	AC-F-008	S10: Delete an Entry				
REQ-F-009	AC-F-009	S2: Create an Entry with All Details; S8: Create and Structure a General Note				

Requirement ID	Acceptance Criterion	BDD Scenario	Ticket	Test	Code	Documentation
REQ-F-010	AC-F-010	S3: Chapter and Book Associations				
REQ-F-011	AC-F-011	S3: Chapter and Book Associations				
REQ-F-012	AC-F-012	S3: Chapter and Book Associations; S6: Export Book Project in Chapter Order				
REQ-F-013	AC-F-013	S3: Chapter and Book Associations; S8: Create and Structure a General Note				
REQ-F-014	AC-F-014	S3: Chapter and Book Associations				
REQ-F-015	AC-F-015	S3: Chapter and Book Associations; S8: Create and Structure a General Note				
REQ-F-016	AC-F-016	S3: Chapter and Book Associations				
REQ-F-017	AC-F-017	S3: Chapter and Book Associations				
REQ-F-018	AC-F-018	S3: Chapter and Book Associations				
REQ-F-019	AC-F-019	S4: Symmetric Entry Links				
REQ-F-020	AC-F-020	S4: Symmetric Entry Links				
REQ-F-021	AC-F-021	S4: Symmetric Entry Links				
REQ-F-022	AC-F-022	S5: Search and Combined Filters; S7: Offline Use, Persistence, and Deferred Sync				
REQ-F-023	AC-F-023	S5: Search and Combined Filters				
REQ-F-024	AC-F-024	S5: Search and Combined Filters				
REQ-F-025	AC-F-025	S5: Search and Combined Filters				
REQ-F-026	AC-F-026	S7: Offline Use, Persistence, and Deferred Sync; S9: Export Success and Failure				
REQ-F-027	AC-F-027	S6: Export Book Project in Chapter Order				
REQ-F-028	AC-F-028	S6: Export Book Project in Chapter Order				

Requirement ID	Acceptance Criterion	BDD Scenario	Ticket	Test	Code	Documentation
REQ-F-029	AC-F-029	S6: Export Book Project in Chapter Order				
REQ-API-001	AC-API-001	S11: Synchronize Pending Changes				OpenAPI: protocol, base path, media types
REQ-API-002	AC-API-002	S11: Synchronize Pending Changes				OpenAPI: security scheme and authorization
REQ-API-003	AC-API-003	S11: Synchronize Pending Changes				OpenAPI: Entry operations and schemas
REQ-API-004	AC-API-004	S3: Chapter and Book Associations; S11: Synchronize Pending Changes				OpenAPI: Book operations and schemas
REQ-API-005	AC-API-005	S3: Chapter and Book Associations; S11: Synchronize Pending Changes				OpenAPI: Chapter operations and schemas
REQ-API-006	AC-API-006	S11: Synchronize Pending Changes				OpenAPI: Tag operations and assignments
REQ-API-007	AC-API-007	S3: Chapter and Book Associations; S11: Synchronize Pending Changes				OpenAPI: association operations and provenance
REQ-API-008	AC-API-008	S4: Symmetric Entry Links; S11: Synchronize Pending Changes				OpenAPI: Entry Link operations
REQ-API-009	AC-API-009	S5: Search and Combined Filters				OpenAPI: search, filters, pagination
REQ-API-010	AC-API-010	S11: Synchronize Pending Changes				OpenAPI: sync, cursor, tombstones
REQ-API-011	AC-API-011	S7: Offline Use, Persistence, and Deferred Sync; S11: Synchronize Pending Changes				Client offline/outbox behavior
REQ-API-012	AC-API-012	S12: Retry an Unacknowledged Sync Operation; S13: Detect a Concurrent Update				OpenAPI: idempotency and revisions
REQ-API-013	AC-API-013	S12: Retry an Unacknowledged Sync Operation; S13: Detect a Concurrent Update				OpenAPI: errors and operation outcomes

Requirement ID	Acceptance Criterion	BDD Scenario	Ticket	Test	Code	Documentation
REQ-API-014	AC-API-014	S11: Synchronize Pending Changes; S12: Retry an Unacknowledged Sync Operation; S13: Detect a Concurrent Update				OpenAPI specification; Mock API
REQ-NF-001	AC-NF-001	NFR verification: local save latency with 1,000-entry SQLite fixture on minimum OS simulator/emulator				
REQ-NF-002	AC-NF-002	NFR verification: local search/filter latency with 1,000-entry SQLite fixture on minimum OS simulator/emulator				
REQ-NF-003	AC-NF-003	S7: Offline Use, Persistence, and Deferred Sync				
REQ-NF-004	AC-NF-004	S7: Offline Use, Persistence, and Deferred Sync				
REQ-NF-005	AC-NF-005	S3: Chapter and Book Associations; S11: Synchronize Pending Changes; NFR verification: relationship integrity across create/edit/detach/delete/sync				
REQ-NF-006	AC-NF-006	S3: Chapter and Book Associations				
REQ-NF-007	AC-NF-007	NFR verification: install and launch on Android API 29+ and iOS 15+				
REQ-NF-008	AC-NF-008	NFR verification: core workflows at 360 x 640 dp viewport				
REQ-NF-009	AC-NF-009	NFR verification: accessibilityLabel presence and platform text scaling				
REQ-NF-010	AC-NF-010	S9: Export Success and Failure				
REQ-NF-011	AC-NF-011	S9: Export Success and Failure				

Requirement ID	Acceptance Criterion	BDD Scenario	Ticket	Test	Code	Documentation
REQ-NF-012	AC-NF-012	NFR verification: ISO-8601 UTC timestamps and 2 MB FIFO log rotation, including sync events				
REQ-NF-013	AC-NF-013	NFR verification: confirm no user-facing diagnostic-log UI				
REQ-NF-014	AC-NF-014	NFR verification: TDD evidence and Jest statement/branch coverage thresholds for client, sync, and API behavior
